ABSTRACT:

US Administration recently withdrew its forces from Afghanistan, nearly after spending two decades and in the process loosing more than 2400 soldiers and more than 20 thousand soldiers were wounded, in addition to over 2 billion dollars lost in the adventure of establishing democracy and wiping out terrorism. And the similar Phenomena can be observed in the countries like Iraq, Syria, vENZEVLA, Arabian monaschies etc. There has also been an instance like political instability in Nepal, Srilankan economy crumbling under Chinese Debt to such an extent that it was forced to borrow money on interest to pay the already incurred Debt.

In the present paper, an attempt has been made to study the Implications of Globalization on National security. The historical context, Present day geopolitical scenario, impacts and remedies have also been dealt with.

Keywords: Globalization, National Security, Interdependence, Interconnectivity, Information and Technology.

INTRODUCTION:

Globalization can be defined as becoming, one, of the entire globe. In other words, it is the Process of integration of the countries of the world through various factors such an socio-Economic, Political, Educational and numerous other attributes. The phenomena are not new, as it has been in Practice for many centuries. However, the intensity of globalization has picked pace with the advancement in the field of Information & Technology.

OBJECTIVES:

1. To study the Implications of Globalization on National security.
2. Present day geopolitical scenario, impacts and remedies have also been dealt with.

RESEARCH METHODOLOGY:

The present study uses secondary data which are collected from various sources like BBC archives, National defense University report, and website of ministry of external affairs, Ministry of Housing and Urban Development and The Hindu News articles.

After depth study of above mentioned data I tried my best to explain it in my own way.

HISTORY:

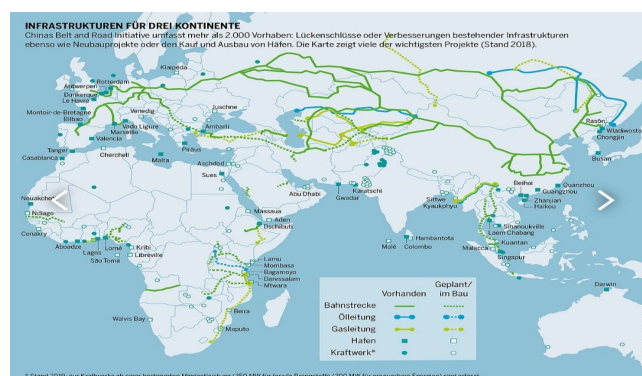

If we go back in the history, we find that the people of Indus valley civilization used to trade with persian and sumerian civilization, similar has been the cases with mesopotamian, Roman & Greek civilization. The process gained momentum when the Arabian kingdoms were most dominant in the world. later on European countries started searching other trade routes as it was becoming unfavorable for them to pay taxes to the muslim Kingdoms. Hence came in to picture, new concepts like colonialism, mercantalism, Imperialism which had huge impact on the inhabitants of the local places.

East India Company came in India with the Purpose of doing trade, however after observing turmoil and instability in India, it ended up with the establishment of British Rule over the entire dominion of India. Moreover, in the Process, country had become battleground for European powers like Britain, French, Dutch, Danish, Portugal etc. And at the end, it culminated into division of country into two dominions i.e, India and Pakistan.

Two of the biggest wars fought in the mankind history, 1st World War, and 2nd World War have their ignition in geopolitics of the time.

ECONOMIC PERSPECTIVE:

There had been massive Outrage on the streets of Pakistan regarding lack of employment opportunities to the locals in infrastructure projects carried out by china under the " Built and Road initiative", There had been similar demonstration of Protest throughout the srilanka, regarding handling Over of "Hambantota port" to chinese govt as they were not able to pay off their debt and hence were forced to Lent the port on lease. And the situation is similar in numerous countries spanning across Africa, Europe, Asia, where china is providing Excess loan on cheaper rate and when they defer in the repayment of these loans, then they are forced to sign the lease agreements.

Source:[https://en.m.wikipedia.org/wiki/Belt_and_Road_Initiative#/media/File %3AChina_Belt_Road_Initiative_Landkarte_Projekte_2018.jpg](https://en.m.wikipedia.org/wiki/Belt_and_Road_Initiative#/media/File:%3AChina_Belt_Road_Initiative_Landkarte_Projekte_2018.jpg)

India, where, there had been plenty of MSME, involved in manufacturing toys, prevalence of local toy manufacturing have lost their ground to various foreign toy manufacturing companies. multinational food companies like MacDonald, Subway, Pizza Hut, Domino's coca cola etc. can be found in every city of the country, which has replaced the local food outlets. And the trend is limited not only to the food sector, but covers other spheres also like clothing, Automobile, Information technology, beauty & cosmetics etc.

Indian government decision of not joining BRI and not signing "Regional comprehensive Economic Partnership" (RCEP) in although viewed as anti-Globalization stance, but it has been a blessings in disguise for the Economy of the country. The local market has been saved from the cheaper manufactured Products from china and the flood of cheaper dairy Products from Australia and

Newzeland. Thus serving the dual purpose of avoiding unemployment and disinflation.

INDIA'S TRADE BALANCE WITH RCEP MEMBERS		
RCEP Member	2018-19	2019-20
ASEAN	-21.85	-23.82
China	-53.58	-48.65
South Korea	-12.05	-10.81
Japan	-7.91	-7.91
New Zealand	-0.25	-0.14
Australia	-9.61	-6.93

All figures in \$ billion

POLITICAL PERSPECTIVE:

The revelations made by the "Cambridge Analytical" throws light on the frightening impacts of the Information & technology and the social media platform. Russia was suspected of meddling in the 2016 U.S. Presidential elections and it was believed to be operating from the African country of Ghana. The "Arab spring" incident observed in the Arabian monarchies in the Early 2010 was largely fuelled by the global powers exploiting the anger and frustration of the local population, There has been large outrage in Iran over the alleged killing of its military officer by the American forces. The relation between India-Nepal had reached the bottom rock during the reign of K.P. oil is premier largely thanks to games played by chinese government in the name of development Projects and aids. There has been USA intervention in the domestic politics of other countries around the world in the name of saving or Implementing Democracy, but the real reason has been their self-interest. Like Syrian crisis, Iraq crisis, venezuela etc.

SOCIAL PERSPECTIVE & CULTURAL PERSPECTIVE:

On paper, the term globalization represents the intermixing of economies & countries, sharing their unique traits and features. But in reality is can equated with the westernization i.e. imposition of western culture, Practices, beliefs etc. Over others. Globalization is equated on Par with the capitalist economy, as a result of which the already well off sections and elites and those living in urban areas are the ones benefitting most, while the already vulnerable sections have suffered. Thus it is considered to have increased the rift and inequality prevalence In the Society.

There has been a feeling among the people that globalization has led to deterioration and in some cases even loss of cultural identity of the local people for example, English, a universally accepted and spoken language is viewed as superimposing over local languages. However it cannot be neglected that it has enabled us to look at things with different perspective and understanding the things better.

However, Politicisation of islam, backlash against the western valves and Principles like utilitarianism and materialism have started impacting the society.

TECHNOLOGIED PERSPECTIVE:

If there is one dimension where the impact of globalization has been maximum then that in the field of Information and technology. Technological advancement in the field of science has made the life of People much easier and

comfortable, like innovation and advancement in the fields like Manufacturing Sector, Automobiles, telecommunication etc. is not restricted to the place of origin. Rather it has spread throughout the world. Mobile phone, social media platforms, television etc. are accessible throughout the world. And any individual can share their things to anyone in any part of the world.

However it comes with their fair share of negative aspects. As there has been seen an unprecedented increase in the cases of cyber Crimes like extorting, Bullying, cyber frauds etc. These things are used by anti-social elements to incite Riots and communal tensions in the society. There have been cases where there has been direct action by one country against the other in the recent part, like Alleged USA attack on the nuclear installations of Iran. Kundalkulam Power Plant of Tamil Nadu was attacked by chinese hackers. There is a specific department in North Korean government especially targeted towards identifying hacking talents and then they are groomed.

CONCLUSION:

Every coin has two sides, so does Globalization. It does pose various challenges, which are very dynamic in nature, but at the same time, it also has provided us with the option of global cooperation's like "Interpol", "Financial

Action Tank force", "UNO" etc. cope up with these challenges, Exchange, sale and buy of strategic weapons to deal with them.
