Abstract

Achievement motivation of Inter College Cricket Sports participating this study. We Selected 218 Inter College Cricket participants studying Senior College. The age of 20 to 25 years were selected as subjects. The participants selected the basis of study to his own Variables. For this study Sports person for the institution. To Study of the variations the selected Creation variables and the demographic variable Achievement motivation, the analysis of variance for factorial experiment was used. Means Factorial experiment means $3 \times 2 \times 2 \times 2$. for to be significant, the simple effect test was used as a post hoc test to the 'F' ratio determine which of the was significant by the group. It is concluded that the Cricket Sports in Private College are more Significant than the Cricket Sports of Government College and achievement motivation in Government aided college

Keywords: *psychological-achievement motivation-sports.*

Introduction

In the Sport psychology is concerned with the psychological foundations of the psychological regulation of sport related various activities of more than one persons or sportsperson showing the subject of the any activity. The main focus may be on sports person behaviour, or on different psychological behavior of human, i.e., sensory motor dimensions motivational and any other . The physical activity can take including health related exercise, place in competitive, preventative ,educational, recreational. The subjects are all Sports man join in the different sports and exercise settings, e.g., Cricket Sports participants, coaches, officials, teachers, physiotherapists etc. Certain types of sportsperson are therefore motivated in any situations where achievement is compared - (i.e 'achievement orientated'). Gill (1986) " A person who has high levels of achievement motivation would have a tendency to strive for success, persist in the face of failure and experience pride in accomplishments" The level of a person's need drive for success is a relatively stable a positive approach in relation to their 'achievement motivation as well as ' tendency of positive success '- To achieve a high level of performance for many time. McClelland-Helps and Classical Theories (Atkinson 1964&1974) explain how a person's need to achieve is developed, and enables predictions of future behaviour, i.e. performance.

Objectives of the study:-

1. To the Classify that the achievement motivation of Inter College Cricket participants and To find out them.
2. The influence of the following variables on the achievement motivation of Inter College Sports participants and to the o find out them.

Statement of the problem:-

The purpose of the study is on achievement motivation of Inter College Cricket Sports participants participate in Interuniversity competition.

Delimitations:-

1. The study was delimited to Inter College Cricket Players only
2. The study was restricted to the three Psychological variables in the Achievement motivation.
3. The study was limited to the assessment of players of achievement motivation in Inter College Cricket players in Senior college

Significance of the Study:-

To strive for Successes Achievement Motivation is the present in the face of failure and experience pride in accomplishments. How achievement motivation influences the terms, means and how it relates and help for to competitive spirit in other sports.

Methodology:-

The study of all the Inter College Cricket participants studying in Senior College. The

area were considered as Participant for the study. A preventive sample of 218 Inter College Cricket participants in the age of 20-25 years were Selected for the study. The selected participants' was adjusting on the basis of variables of the study. The study independent variables are gender, type of institution the dependent variable is achievement motivation.

Test Administration – Achievement

Motivation:-

For the data collection in this study was prepare the questionnaire was standardized by the analyst after conducting through pilot study in selected institutions of Gadchiroli(India). The questionnaire comprises in the two parts.

Part 1: To The collect primary information regarding Inter College Cricket Participants gender through designe.

Part 2: The scale of Achievement motivation: In This Scale 50 questions and was Prepare by the researcher based the scales and questionnaires.

Analysis of Data:-

The selected subjects was divided by three types of Senior college players: Government,

Table 1: Summary of mean, standard deviation, minimum and maximum values of Inter College Cricket participant of different gender, area, type of college and level of participation on achievement motivation

Category	Mean	S.D	Min.	Max.	No.	
All Respondents	15	13.518	79	142	311	
Gender	Male	113.46	13.729	81	142	193
	Female	113.42	13.325	79	141	119
Area	Rural	112.76	13.618	79	142	188
	Urban	114.48	13.355	79	142	124
Type of College	Government	109.47	13.819	79	137	76
	Government Aided	114.21	13.666	81	142	203
	Private	115.52	11.182	94	136	34

The analysis of variance for 3 x 2 x 2x 2 factorial experiment on achievement motivation of different gender, area, types of college have been analysed and presented in Table 2.

Source of Variance	Sum of Squares	df	Mean Squares	F-value
Gender	53.359	2	53.359	0.318
Area	213.592	2	213.585	1.245
Type of College	2756.237	3	1378.203	8.112
Total	3,023.201	4	1,645.132	9.59

Significant at .05 level of confidence

The table value required for significance at .05 level with df 2& 4 is 3.88. Table II shows that the F-ratios for the type of college is 8.112 against 3.05

Table 3: differences between through Schaeffer's test the mean scores of different type of Inter

Type of College			Mean Differences	Government Interval
Government	Government Aided	Private		
108.49	113.22		4.69*	4.39
108.49		114.59	6.14	6.79
	113.22	114.59	1.32	6.18

Dr.Pankaj Chaudhary

Government aided and Private and subjects was classified. The selected for this study was an achievement motivation as psychological variables. The selected variable was evaluated by the standardized psychological interview schedule. To determine the deviation among the selected variables and the demographic variables such as Achievement motivation, the analysis of variance for factorial experiment was used. the 'F' ratio for interaction to be significant, the post hoc test to determine which was significant. when the 'F' ratio was found to be significant, the Schaffer's test was used as a post-hoc test to determine which of the three paired mean differences were found to be significant.

Results

Findings:-

Through the mean, standard deviation, minimum values and maximum values on the achievement motivation of Inter College Cricket participant of demographic variables such as gender, area, type of college have been presented in Table 1.

Table 2: Summary analysis of variance for 3 x 2 x 2 x 2 factorial experiment of Inter College Cricket participant of different gender, area, types of college of participation on achievement motivation

(df 2 and 4) which is significant at 0.05 level on achievement motivation.

College Cricket participant on achievement motivation.

There is no significant differences exist between the Inter College Cricket participant of Government College and Private College; and the Inter College Cricket participant of Government aided college and Private College in achievement motivation. It is concluded that the Inter College Cricket participant of Private College are better than the Inter College Cricket participant of Government College and Government aided college in achievement motivation.

Discussion/Conclusions:-

The study revealed that was no significant difference between the Inter College Cricket participant in the mean scores of different type of gender, area and participation on achievement motivation. The result of the study indicated that there insignificant difference exist among the Inter College Cricket participant in the mean scores of different type of colleges on achievement motivation. Further, it is revealed that the Inter College Cricket participant of Government aided college are better than the athletes of Government College and Private College in achievement motivation. Further, it is revealed that the female Inter College Cricket participant of Government aided college are

better than the female Inter College Cricket participant of Government College and Private College in achievement motivation.

Recommendations:-

1. Similar study may be Apply in various age groups.
2. Similar study may be taken to any other body types.
3. Similar study may be taken teachers and Sport coaches
4. To improve the any other Sports Person skills.
