### **Introduction**

*On taking Global language into consideration, it reflects on the global village and global citizenship. Link or bridge or unifying culture is nothing but the language of unity that held up with two things. That is politics and culture. According to Jawaharlal Nehru, in Indian parliament, he needs “English to be thrown out” but at the same time he wants to keep it up. So through this he says, English is a “unified Language”. On considering Library language, in any modern library we can take for example where we can see 80 percent of the books will be in English language only. Which is a unavoidable truth. This actually helps people to know the translated works and read books with pleasure. Trade and Commerce showcase, though all products are made or might have received from China the profit makers will be English language people only than any. Science and Technology too adheres the same manner. In the case of Job, it reflects on the career opportunity. Even in the time of pandemic too we can visually realize that, in any Internal school, they starts to give or pay at least 30,000 per month as their initial salary for the people who are well versed in English language. Even the students with good communication skills are benefited in a way within their final year, they are offered with this type of opportunities with free boarding. When we take Kuran which is written in Arabic, Bible that is written in Hebrew, and Bhagavatgita which is written in Sanskrit, all are actually available in English. So that without knowing these languages like Sanskrit, Hebrew and Arabic people people can know the content easily in English itself.*

---

Initially to begin, it is necessary to know the role or what is English language in general. For that certain things are to be noted. These in fact makes us to know its importance and thereby the list are as follows:

1. English as a Global Language
2. English as a Link or Bridge or unifying culture
3. English as a Library Language
4. Trade and Commerce
5. Science and technology
6. Job

### **Role of English in India**

India is tend to be the 3rd largest country. Where English is treated as the must known language. When one speaks in English there he or she keeps up their prestige in high level. In India,

English is occupied and treated as a prestigious language. Though for many, Tamil language is considered as the “soul”, as it is their mother tongue, but the language of future is considered to be English and thereby English is meant as the “stomach” where it is treated as food for one's energy and ultimately as ones life itself. In many of our homes, the origin may differ, but may speak in English by shunning the common culture, political history, and common literary folk tradition. Even Christian missionaries demand to speak in English either at school or colleges. Discussion are also taken placed around the world by English language only. This in need has become a official medium too.

### English Language in General

Language is all about dealing with symbols and sounds, signs and scripts. Scripts in the sense it represents letters. In English it is said that, the alphabet are of 26 letters and 44 sounds. But the structures are of 244. As Michel said, “signs of signs” is said to be alphabets. It is said that “practice makes a man perfect”. As per the proverb, similar to swimming, cycling and drawing pictures, it is in need to make use of English language in our daily routine. English is no more a language. It is a vital skill as cooking, driving and so on. It needs practice. In reality, there are many people as learners to come forward to learn English language rather than of users to use English language. But the fact is that, people are not using it. It has to be used regularly. Rabindranath Tagore had won Nobel Prize for his Gitanjali. The real reason behind it was W.B. Yeats who translated Gitanjali from Bengali into English.

### A Few Letters for Reading and Enjoying

Here are some letters taken as a model in a way for reading and to have fun. Initially, an employee who works in Infosys, Bangalore writes a leave letter, that, “since I have to go to my village to sell my land along with my wife, please sanction me leave. “ And on the other, a man who is in need of performing the marriage of his daughter, he writes, “as I am marrying my daughter, grant me a week leave.” Then the other letter, where a man in need to write that is mother-in-law expired stating, “I am the only one responsible for it, grand me a half day leave.” Actually he is the only person who have to do all sort of last funeral ceremony and all but he do writes like this. On the other, the letter which is written by a college student, is like this, “as I am suffering in this college, I am suffering from headache. I request you to give leave.”

### Hurdles Widely Faced in Communication

Hurdles in the sense is of imaginary problems. For this, we should educate students to remove these problems. It is true that “active vocabulary more as words will stand in queue begging one and all to use it”.

### The common hurdles are as follows : Vocabulary

It is said that with 500 words one can easily speak for at least three hours. In vocabulary there are two types, one is active vocabulary and the other is passive vocabulary. In fact, here active vocabulary are the words used for communication. In commerce they have a term called as “death money”. Where if there is 20,000 rupees and from it 19,000 rupees is kept in locker, 19,000 rupees is said to be “death money” as it is in locker.

Whereas the rest of the money that is 1,000 rupees is allotted for business, and that 1,000 rupees is said to be “living money” as we can generate at least one rupee more from it. Likewise if one knows the meaning but dead inside oneself is said to be active vocabulary. On the other, passive vocabulary are of linkers such as “ah”, “um”, “ahm” in a way struggling or making pause is said to be this kind of vocabulary.

We can try to change active vocabulary to passive vocabulary. For instance, we can try to use the word “cobbler” as in beginning, middle and end of the sentence, at least three times a day. This helps each one of us to learn at least one word every day.

### Pronunciation

It is important for the learners not to worry about pronunciation. They can frame words with the end sounds. For example:

Age –

1. Marriage 2. Passage 3. Language
4. Village 5. Milage

**Environment****First Generation**

People of first generation rather than the present generation will give lame excuses as they speak English for the first time.

**Regional medium**

Here though many of the students are from Tamil medium, it will be the first step hurdle to make them go with English language. Which is actually a toughest job ever.

**Lack of cooperation****Grammar**

It is not necessary to know Grammar. Without knowing Tamil Grammar that is without knowing "Yappu Illakanam" also Tamil speakers use it day to day in a way they can write and speak Tamil in their regular life. "Grammar is the mechanism of language" said Chomsky. Along with this, learning, reading, writing, and speaking are the part of communication skill. These are user friendly. There is no need of grammar. Chomsky also said, "Grammar is intuitive".

**Various Causes of Speech Inclination**

Speech Apprehension or Inclination is nothing but stage fear. There is a need to concentrate on Communication Skills. There are two types of people. One is extrovert and the other is introvert. Where the introvert will have doubt in spite of his or her talents. There is in need to know where to speak rather than how to speak. The causes are as follows:

1. Biological based temperament  
Biological in the sense it represents nervousness.
2. Previous bad experience  
In this case it is with "is, was" and "has, have".
3. Level of Skill

This is a very important thing for teachers. This in a way a developing skill.

Apprehension is an in born thing. This of neuro-biological.

Extroversion are, 1. dominant, 2. Sociable, 3. Lively, 4. Actively, 5. Assertive, and 6. Adventurous.

Introversion or neuroticism are of,

1. Generally curiosity, 2. Depression, 3. Guilt feeling, 4. Shyness, 5. Mood swings, and 6. Irritation thoughts.

**Focus on**

It is necessary to focus on the below things:

1. Reading and writing skill which is the need of the hour, and
2. Listening and speaking skills.

**Conclusion**

Thereby to conclude, English is a vital or essential skill for carrier. It is a regular and lengthy process. This skill have to be improved. This is a responding communication. Leaders are created only through the speech skill. That is the power of speech. For that, we should never judge. It is also advisable to take English speaking course to develop speaking skills. Each and every one should become master not as slave. Thus to say, "English could not be taught, it can be caught."
